ABSTRACT: The social media and other social networking sites turn out to be a major part of our civilization, Electronic patient education and communications, such as email, and social media, are on the rise in healthcare today, With scientific progress and the spread of inventions And the emergence of new things that were not in earlier times Social networking sites have proliferated in the present era Where he became the most people or everyone they have a social account on the social networking site, We cannot deny the benefits and positives these sites But we cannot also deny what brought him from cons cannot be counted, Here we will talk about the pros and the cons in detail. My studies this is only to draw attention to the multiple risks arising from the misuse of social networking sites in various programs and fields, I saw the need for studies to find out public opinion about the pros and cons of these sites and impact in the community, we discuss the articles in this special section and conclude with considerations for future research. Also touched on the possibility of proposing some solutions to reduce the negatives caused by such programs.

INTRODUCTION

Social networking sites have become very known where become people they communicate with each other and get to know each other through these sites and find out what's new. The idea of this study was to Connie and leafing through on the internet Noticed a lack of research and studies on these topics The fact that the programs WhatsApp and Facebook are a new programs are considered. I will talk about the effects of all that is important in this regard does not have, note of that there is no control on these sites, and no ways to avoid the problems of those sites, which affected the lives of the people in general, either negative or positive.[2]. There's no doubt that we live in an increasingly electronic world, the latest numbers from the Pew Research Center's Internet & American Life Project make it clear:

- 85% of Americans are online.
- 55% of US adults go online wirelessly.
- Small screens much more than the big screens: mostly of US adults own a smart phone.
- 17% of US adult cell phone owners use their phones to look up health or medical information).

The goal of this introduction is to providing scientific context for articles in this collection we begin by defining what constitutes a social network site and then present one perspective on the historical development of the impact of social media on society, there are positives to this new technology but nowhere do these positives outweigh the negatives. Social networking sites have made from the world a smaller home, and Social networking sites are the product of technological advancement of computer systems that provide email [2][3].

RESEARCH TOPIC:

We'll talk in the beginning about the negatives that do not expire, where he was in every day, maybe every hour new negative:

1- The spread of rumors:

I've become social networking sites an important source for the spread of rumors and spreading corruption among the people as part of the existence of people who are hard of heart and Affects them any position and they are many, It is example of this is due person create a page on behalf of a fictitious person may hate, perhaps to provoke or to speak on behalf of that person and download A fake images and the words of

improper and indecent pictures and possibly include this page also fake comments from his friends, purpose of dissemination of sedition.[5]

2- SPOOFING CAREER:

He performed one of the people writing on page his he doctor or engineer or analyst problems or has a Employing Company etc., Through this profession attracts the faint hearted and minds Limited and knows them from their stories and endless and erect fraud and possibly up to more than the cases of rape and problems family and may have been killed, where we heard from more than one like this.[5]

3- CHANGE THE NATURE OF THE PERSON:

There are a lot of people Representing the role of the good man who is every girl's dream, and begin to identify the girls On he is unparalleled and he is the only man in this world, which is estimated girl and estimated the marital relationship And he the owner of money and power, And when it begins to ask the girl to factual relationship with him and refuses to be a girl this show begins here detects the truth of this good man and turn into a bad guy and here are the major crime and may the revenge episode begins here.

4- BRAG ABOUT IN ATHEISM:

Spread this phenome-non and is one of the most dangerous phenomena They brag about in atheism, When there will be free-dome to write what they like from problems, And ask to stop at some of the sharia rulings

5- USE SOME YOUNG:

Is there a range of activities promoting some young and recruited to serve them, Where they persuading them that way they fighting of corruption, Where they will be exploitation them on political matters And stirring doubts about the ruler until it is excluded later on.[6]

6- FOR EXAMPLE:

Service "WhatsApp" system the last the appearance, exceeded that the sender knows when I read the letter, and when creating a group ???!!how are entitled to a person create a group and add me without asking me if I want or not, Taking you in a group with people who probably is not for you their relationship and perhaps there is no love between you.

Table 1 The proposed Twitter user taxonomy [4]

Category	Influence valuation	Klout score	Usage valuation
Loners	0 - 90	3.55 - 11.07	0 - 500
Individuals	90 - 283	11.07 - 26.0	500 - 4500
Known users	283 - 1011	26.0 - 50.0	4500 - 21000
News Media & Per-sonas	1011 - 3604	50.0 - 81.99	21000 - 569000

7- CONTROLS:

Lack of control behind all these negatives, whether self-censorship or who are directly responsible for you like family and the institution in which they operate ... etc. The pros that can benefit through the use of communication programs and social networking

1- ACQUAINTANCE:

Identify the new people from different areas as possible advantage of them and their expertise in specific areas and topics of discussion with them might serve the community and learn about the cultures of their people and their countries

2- DISTANCES:

That social communications the Make us closer to some, we no longer feel that the traveler is far and absent can not watch it, we became close to each other and become a feeling of alienation has no presence, and even the relatives Where understated the gap between them.

3- TO GET A JOB:

Search for a job through social media since being set up a page for the social networking site and record data, including the profession of a person.

4- THE FASTEST WAY TO EXCHANGE INFORMATION:

Where the largest proportion of people dependent on the means of communication, and the basic role of the press in the follow-up of these sites to be the first to know what's new, Social networking sites stands as an educational aid as student can easily access information for their research.

5- PUBLIC SECURITY:

Could the public security by a use of social networking sites catch the criminals, (In 2011, "New York," Police managed to track site "Twitter" through the site and arrest it through the information that was published on Public profile. [7]

6- Education:

Benefit from the experiences of others and where mistakes in such sites Make it in the individual accepts cash and respect the views of others as a result of discussions that include different nationalities. You can learn about different cultures by connection with people in other countries. After a study with several personalities from the community that surrounds me Included are from universities, staff and students and housewives who have children at different ages The results were as follows: Says «Rima Ahmed» housewife, on social sites users (Facebook) frequently they considered these sites as a booster of social relations between relatives and friends confirmed that those sites may be entertaining for those who are unemployed or who have a large vacuum time. Says «Haya Sma-di» a doctor in a hospital social networking with sites positive and negative values, effects, and that the media have become heavily dependent on these sites to influence young people and says it is against these sites as affecting young people are negative and the possibility of addiction to such those sites being the mother of sons suffered a lot with them even able to control that do not become addicted and confirmed that she is tired and not able to control the family. Says (Basher tall) employee in a private company, that these sites have facilitated contact with people in all segments of society in terms of positive, and it has made the world a small spot where we can not hide any information from the negative side he against a means of communication that .University student says «yazan Samih» that websites have played a major role in the revitalization of revolutions and added that these sites have linked people to each and strengthened social communication between parents, relatives and friends, increasing intimacy and love between them is a fan of those means are very welcome . Says (Abd al-qader) owner of Internet shop and say that these sites have affected the mental lives of young people negatively, although he owns a shop of the Internet, but he believes that young people in isolation from their families and their absence fully by sitting for long periods on online networks and social networking sites specifically .Also news agency Mauritanian published" coercion "03.15.2015 strike as they consider that" social net-working sites are the strikers No one has the authority it "saying that those sites provided them with the channel has no authority to one on them, despite weakness network. "[6]. Published SANA saying within a seminar in the city of Baniyas focused on electronic media and social networking sites were indicated the existence of (90 000) site promotes terrorists and incite against Syria and (42 000) belonging to the terrorist organization "Daash account".

Conclusion:

We must that we working to raise awareness young people the negative aspects of the means of communication; we publish awareness and education between them, the use of means of communication and dissemination of awareness among young people to take advantage of the means of communication in a positive way. Foster a sense of religion. Attention to the role played by some of the social media and the impact of some of the negative obviously on the members of the community and especially the youth. Awareness Family The extent of the importance of religious education for children and the importance of instilling religious faith in them through TV programs and enhance their role in the control of the children through their mobile phones and their friends at school, and education on the modesty of God and computers and surveillance. Not

granting trust for young and girls, in the first the age group. Work on The elimination of full leisure time for young people, especially in the summer holidays. We have applied our methodologies to two popular Social Media, so as to highlight the applicability and the success rate of such techniques. We also exploited the available data in Social Media in order to examine the ethical and legal issues that arise from such methods. We have chosen Twitter and YouTube to apply our methodology, as Social Media and collaborative environments are popular among the users and have been used in the battle against the insider threat. Also, social media can be used as a means of offering a real-life proof-of-concept of the methodologies applied. Although the talk does not end about social networking sites hope that we we have talked several aspects. Many people used social networking, it should only be used as a tool, it cannot become our main form of communication and interaction, Social networking is the problem and we must eliminate its overuse. the subject it is up to each user to use social sites wisely to enhance their professional and social life, and exercise caution to ensure they do not fall victim to online dangers, display Studies show that British companies have lost billions of dollars per year in productivity because of social media addiction among employees. Social networking sites Urges people to be more Privacy about their personal lives, While most sites allow their users to control who sees the things they've posted, We are living in a time where the world is open to us, We also have the communication between people and businesses, Social media has made it possible for like minded individuals to discuss important topics, For example, young people around the world are now more involved than ever in their country's politics, Social media has contributed to that increase in a big way. There are many good things about it, and many bad things. In the end, it might be time to turn off the computer for a bit and go for a walk. such as Twitter, Facebook, Instagram, LinkedIn, as of Jan. 2014, up from 26% in 2008.

Did You Know?

- 1-Social networking sites are a top news source for 27.8% of Americans, ranking below newspapers (28.8%) and above radio (18.8%) and print publications (6%). [9]
- 2-Students who used social networking sites while studying scored 20% lower on tests and students who used social media had GPA of 3.06 versus non-users who had GPA of 3.82. [10]
- 3-35 global heads of state, every US Cabinet agency, 84% of US state governors, every major candidate for US President, and more than 40% of top global religious leaders are on Twitter. [11]
- 4-10% of people younger than 25 years old respond to social media and text messages during sex. [12]
- 5-In July 2012 Americans spent 74.0 billion minutes on media via a home computer (40.8) billion minutes , and 5.7 billion minutes via mobile web browsers, a total of 121.1 billion minutes on social networking sites. [12]

SixDegrees.com which was existed from 1997-2001 the first social networking site used to create personal spaces and connect to friends online. Friendster, created in 2002, popula-

rized social networking in the United States but was quickly outpaced by other social networking sites such as Facebook (2004), Twitter (2006), Pinterest (2009), and Google+ (2012).[8]. Social networking sites play a large role in the shaping of the political . More than a quarter of US voters younger than 30 (including 37% of those 18-24 years old) reported that they obtained information about the 2008 Presidential campaign from social media.[8]
